Freelance, part-time, hourly contract and remote projects

English (fluent), Bengali (native), Finnish (beginner)

CLIENT PROFILE

Freelance web designer and developer focused on building clean, mobile-friendly websites for small businesses, professionals and personal brands. I turn business information into clear online experiences with strong calls to action, contact options and practical SEO foundations. My work covers design, responsive development, deployment and basic post-launch support.

WHAT I DELIVER

- Professional pages that clearly explain services, location and contact options.
- Responsive layouts designed for phones, tablets and desktop screens.
- Click-to-call, WhatsApp, contact-form and Google Maps integrations.
- Fast deployment using custom domains, GitHub Pages, Cloudflare or suitable hosting.
- Basic on-page SEO, metadata, analytics setup and straightforward content structure.

SELECTED WEB PROJECTS

Neferiq - International Friendship Platform | Next.js | Supabase

www.neferiq.com Founded and developed a letter-first social platform with account creation, profile onboarding, public letters, user discovery, private messaging and moderation workflows.

International Youth Tech Olympiad | JavaScript | Firebase

iyto.online Developed registration, login, dashboard and olympiad workflows using Firebase Authentication, Firestore and a responsive frontend.

Personal Portfolio Website | HTML | JavaScript | GitHub API

fahimsikderai.com Designed and deployed a responsive portfolio with live repository cards, dark/light mode, SEO metadata and a working contact form.

EXPERIENCE

Independent Web Designer, Developer and SEO Practitioner | 2025 - Present

- Build and deploy responsive websites, landing pages and portfolio sites for practical business and personal use cases.
- Configure custom domains, contact forms, authentication, databases and content-management workflows.
- Apply basic SEO improvements including page titles, descriptions, keyword mapping, internal linking and content structure.

PROJECT PROCESS

01 Discover - Goals, pages and content | 02 Design - Layout and mobile experience | 03 Build - Development and revisions | 04 Launch - Domain, testing and handover

EDUCATION

LUT University, Finland - Admitted Student | Computational Science and Artificial Intelligence HSC, Science - Gazipur Metropolitan College | GPA 5.00/5.00 | 2024 Need a website for your business or personal brand?
